

MIDAS # 3954

KAMANKEAG POND

DAVIS TWP, FRANKLIN CO., MAINE

AREA 40 ACRES

KAMANKEAG POND

Davis Twp., Franklin County
U.S.G.S. Kennebago, Maine (7½')

Fishes

Brook trout
Minnnows
Lake chub
Creek chub

White sucker
Slimy sculpin

Physical Characteristics

Area - 40 acres

Maximum depth - 28 feet

Principal fishery: Brook trout

Temperatures:

Surface - 74°F
26 feet - 49°F

Kamankeag Pond is located west of Spotted Mountain. A number of small tributaries enter the pond from all sides. Its outlet, Kamankeag Brook, flows southwest into the Kennebago River. The pond's shoreline is mostly undeveloped.

The water quality in Kamankeag Pond is good for coldwater gamefish. Brook trout naturally reproduce to provide a fishery. Growth is good despite competition from chubs and suckers. The pond is not stocked.

Access to Kamankeag Pond is restricted as a result of private gated roads. These roads are located north of Route 16 in Lower Cupsuptic Township. The pond is open to fly fishing only with special regulations in the summer and closed in the winter months.
